

Electrical Needs Checklist:

I am a:

- Residential customer
- Small business customer
- General contractor
- Commercial business customer
- Institutional customer (school, hospital, government)
- Industrial customer

My electrical project/problem is:

- New construction project
- Remodel or renovation of existing building
- New lighting or electrical equipment to install
- Existing lighting or electrical equipment not working
- Partial or complete (specify) loss of lighting or electric power
- Erratic operation of electrical or communications equipment
- Electrical panel or outlet is hot to the touch

I would like:

- A bid/estimate/quote on work to be done
- Service call or time-and-material (T&M) rate schedule
- To schedule a service call
- An emergency service call

My project includes these categories (check all that apply):

- New electrical service
- Electrical service upgrade
- Interior building lighting
- Exterior building lighting
- Site lighting (landscape, parking lot, etc.)
- Branch power wiring (wall outlets, fans, appliances, etc.)
- Power panels and distribution equipment
- Power transformers
- Motor and control wiring
- Fire alarm and/or security systems
- Telephone, data, and communications systems
- Video and audio systems (home theater, CCTV, etc.)

My main electrical service is:

This (along with the name of your electrical utility company) can be helpful information if you know it, but is not necessary.

- 120/240 volt, single-phase, 3-wire
- 120/208 volt, 3-phase, 4-wire
- 277/480 volt, 3-phase, 4-wire
- Other (specify) _____
- I don't know
